

T. rex could eat up to 500 pounds of meat in one bite. It had a massive 5-foot-long skull. Its name means tryant lizard king.

Stegosaurus had a large body often as long as 30 feet. Its brain is about the size and shape of a bent hot dog.

Triceratops means 3 horned face. It had a beak-like mouth and around 800 teeth. It weighed over 11,000 pounds.

Most dinosaur skeletons in museums are casts made from resin or plaster, not actual dinosaur bones.

Velociraptor was one of the most intelligent dinosaurs. Its name means swift robber. It could run up to 40 miles per hour.

Apatosaurus was around 75 feet long! It is thought to be one of the largest land animals ever to roam the earth.

Dinosaurs built nests and laid eggs. Some dinosaurs built nests in colonies and the group protected the nests from predators.

Ankylosaurus were armored dinosaurs. They were herbivores who developed large bony plates and spikes for defense.
